

PEDALS BOARD

Introducing :

Introducing **EgoSonoro** revolutionary pedals board with rechargeable power supply on board, derived from **ZeroNoise** series. The **PZN6** and **PED6** pedals board were developed by a EgoSonoro R&D in Italy.

Pedal board PZN6 (powered pedal board):

PZN6 pedal board is made of aluminium alloy base laser cutting, reinforced on the bottom with of welded aluminium alloy tubing. The power supply is located on the bottom, for to save space from the pedal board. Features 8 outputs (6 on 9V and 2 on 12V) that deliver clean, quiet power to your pedals. Neatly conceal connecting cables over, under and through the open slots in the top surface area, permitting easily mount virtually any effects pedal or devices.

The 90% pedal effects (distortion, overdrive, boost, delay etc) using a 9-volt DC power source. Typical sources used are 9V battery or 9V AC adapter.

Why would you use a 9V battery for just a few hours work, or a noisy AC adapter when you can have the solution to your problems?

Standard AC adapters may introduce electrical noise interference on your signal and require a power outlet near you.

With PZNR6 powered pedal board you don't need any power outlet and your signal is perfectly clean for as long as 10 hours work.

FEATURES PZN6 Powered pedal board

- 12V 1,3A Sealed Rechargeable battery
- Up to 10 hours of continuous zero noise power output without the need to recharge
- Eliminates AC ground loops – no more unwanted hum
- Six 9V DC outputs (Boss standard) – two 12V (Standard) power multiple devices; pedals, multi-effect units, and portable recorders
- Multicolour LED provides function mode
- Single on/off button – no need to unplug the individual effects devices
- Rechargeable hundreds of times without any loss of performance – no memory effect
- Automatically recharges cycle (if the device is connected to the power supply by external adapter) when the battery goes below the threshold of 9V.
- Also, during the re-charge mode, the power box continues to supply you the same output voltage without performance degradation. You'll never be caught without your power!
- External power adapter included
- Cables included

FEATURES PZN6 Pedal board

- Aluminium alloy laser cutting
- Dark grey color finish
- Dimensions: (W,D,H) 370x320x65 mm
- Weight: 3,0Kg Approx

Pedal board PED6:

Extremely light, less than 1Kg weight, is made of aluminium alloy base laser cutting, reinforced on the bottom with of welded aluminium alloy tubing and will easily hold from 6 to 8 standard sized stomp boxes.

FEATURES PED6 Pedal board

- Aluminium alloy laser cutting
- Dark grey color finish
- Dimensions: (W,D,H) 370x320x65 mm
- Weight: 900 g Approx

All **EgoSonoro** products, are made by hand in our factory in Italy. All metalwork, boards, transformers and major parts are Italian-made and sourced locally. We take a great deal of pride in our workmanship, and so will you.
